Ledger Screen
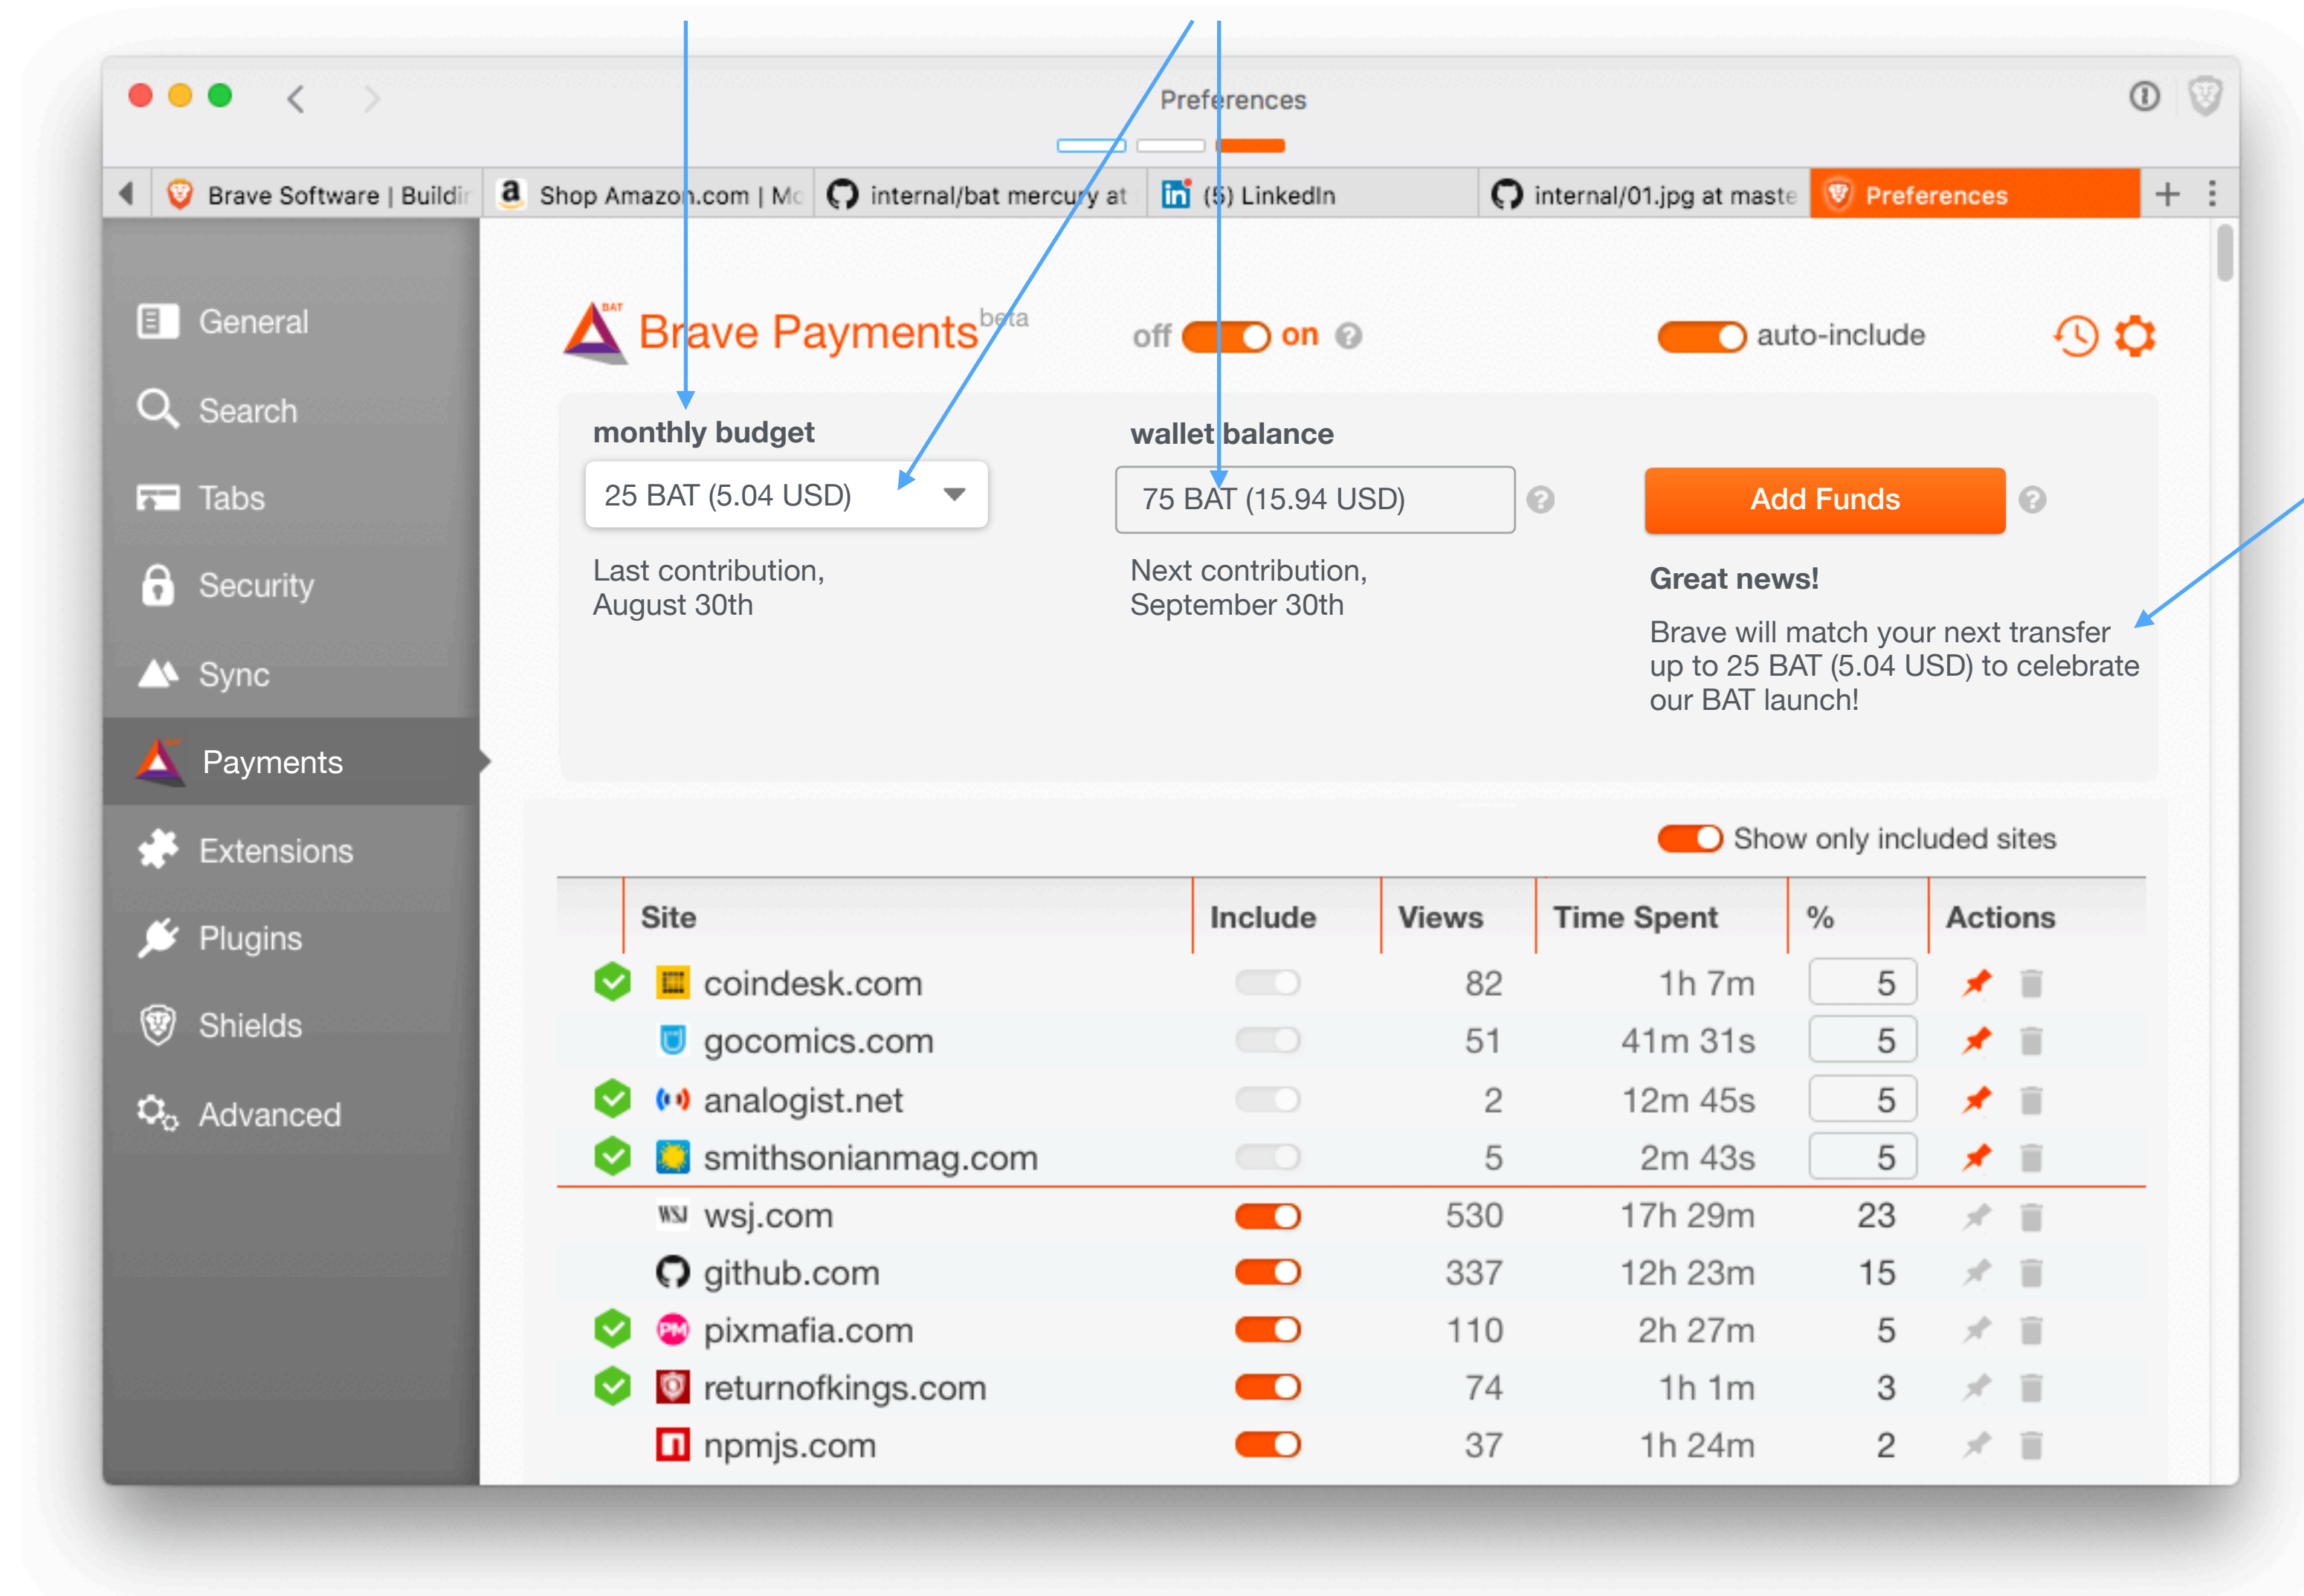

Budget choices menu:

25 BAT (5.04 USD)
50 BAT (10.08 USD)
75 BAT (15.12 USD)
100 BAT (20.16 USD)

wallet balance changes to show BAT in whole numbers and USD in percentages.

NOTE! BTC to BAT conversions will not trigger matching. Matching only works on new transfers.

Message needs new logic to show current USD equivalent. as part of text ring with variable.

**Additional logic:**

First message shows until user adds more funds.

After 1-time only match is used, message changes back to standard message roll.

Add Funds Wizard
Dynamic Page 1

The intro text panel should only appear on first-run of the Add Funds wizard. But previous users of BP will also see this when they upgrade to 0.19.x with BAT integration.

The wallet balance is shown in this dialog both as a reminder and in case it is desirable to wait for a balance refresh between transfers successive transfers. (pending feasibility)
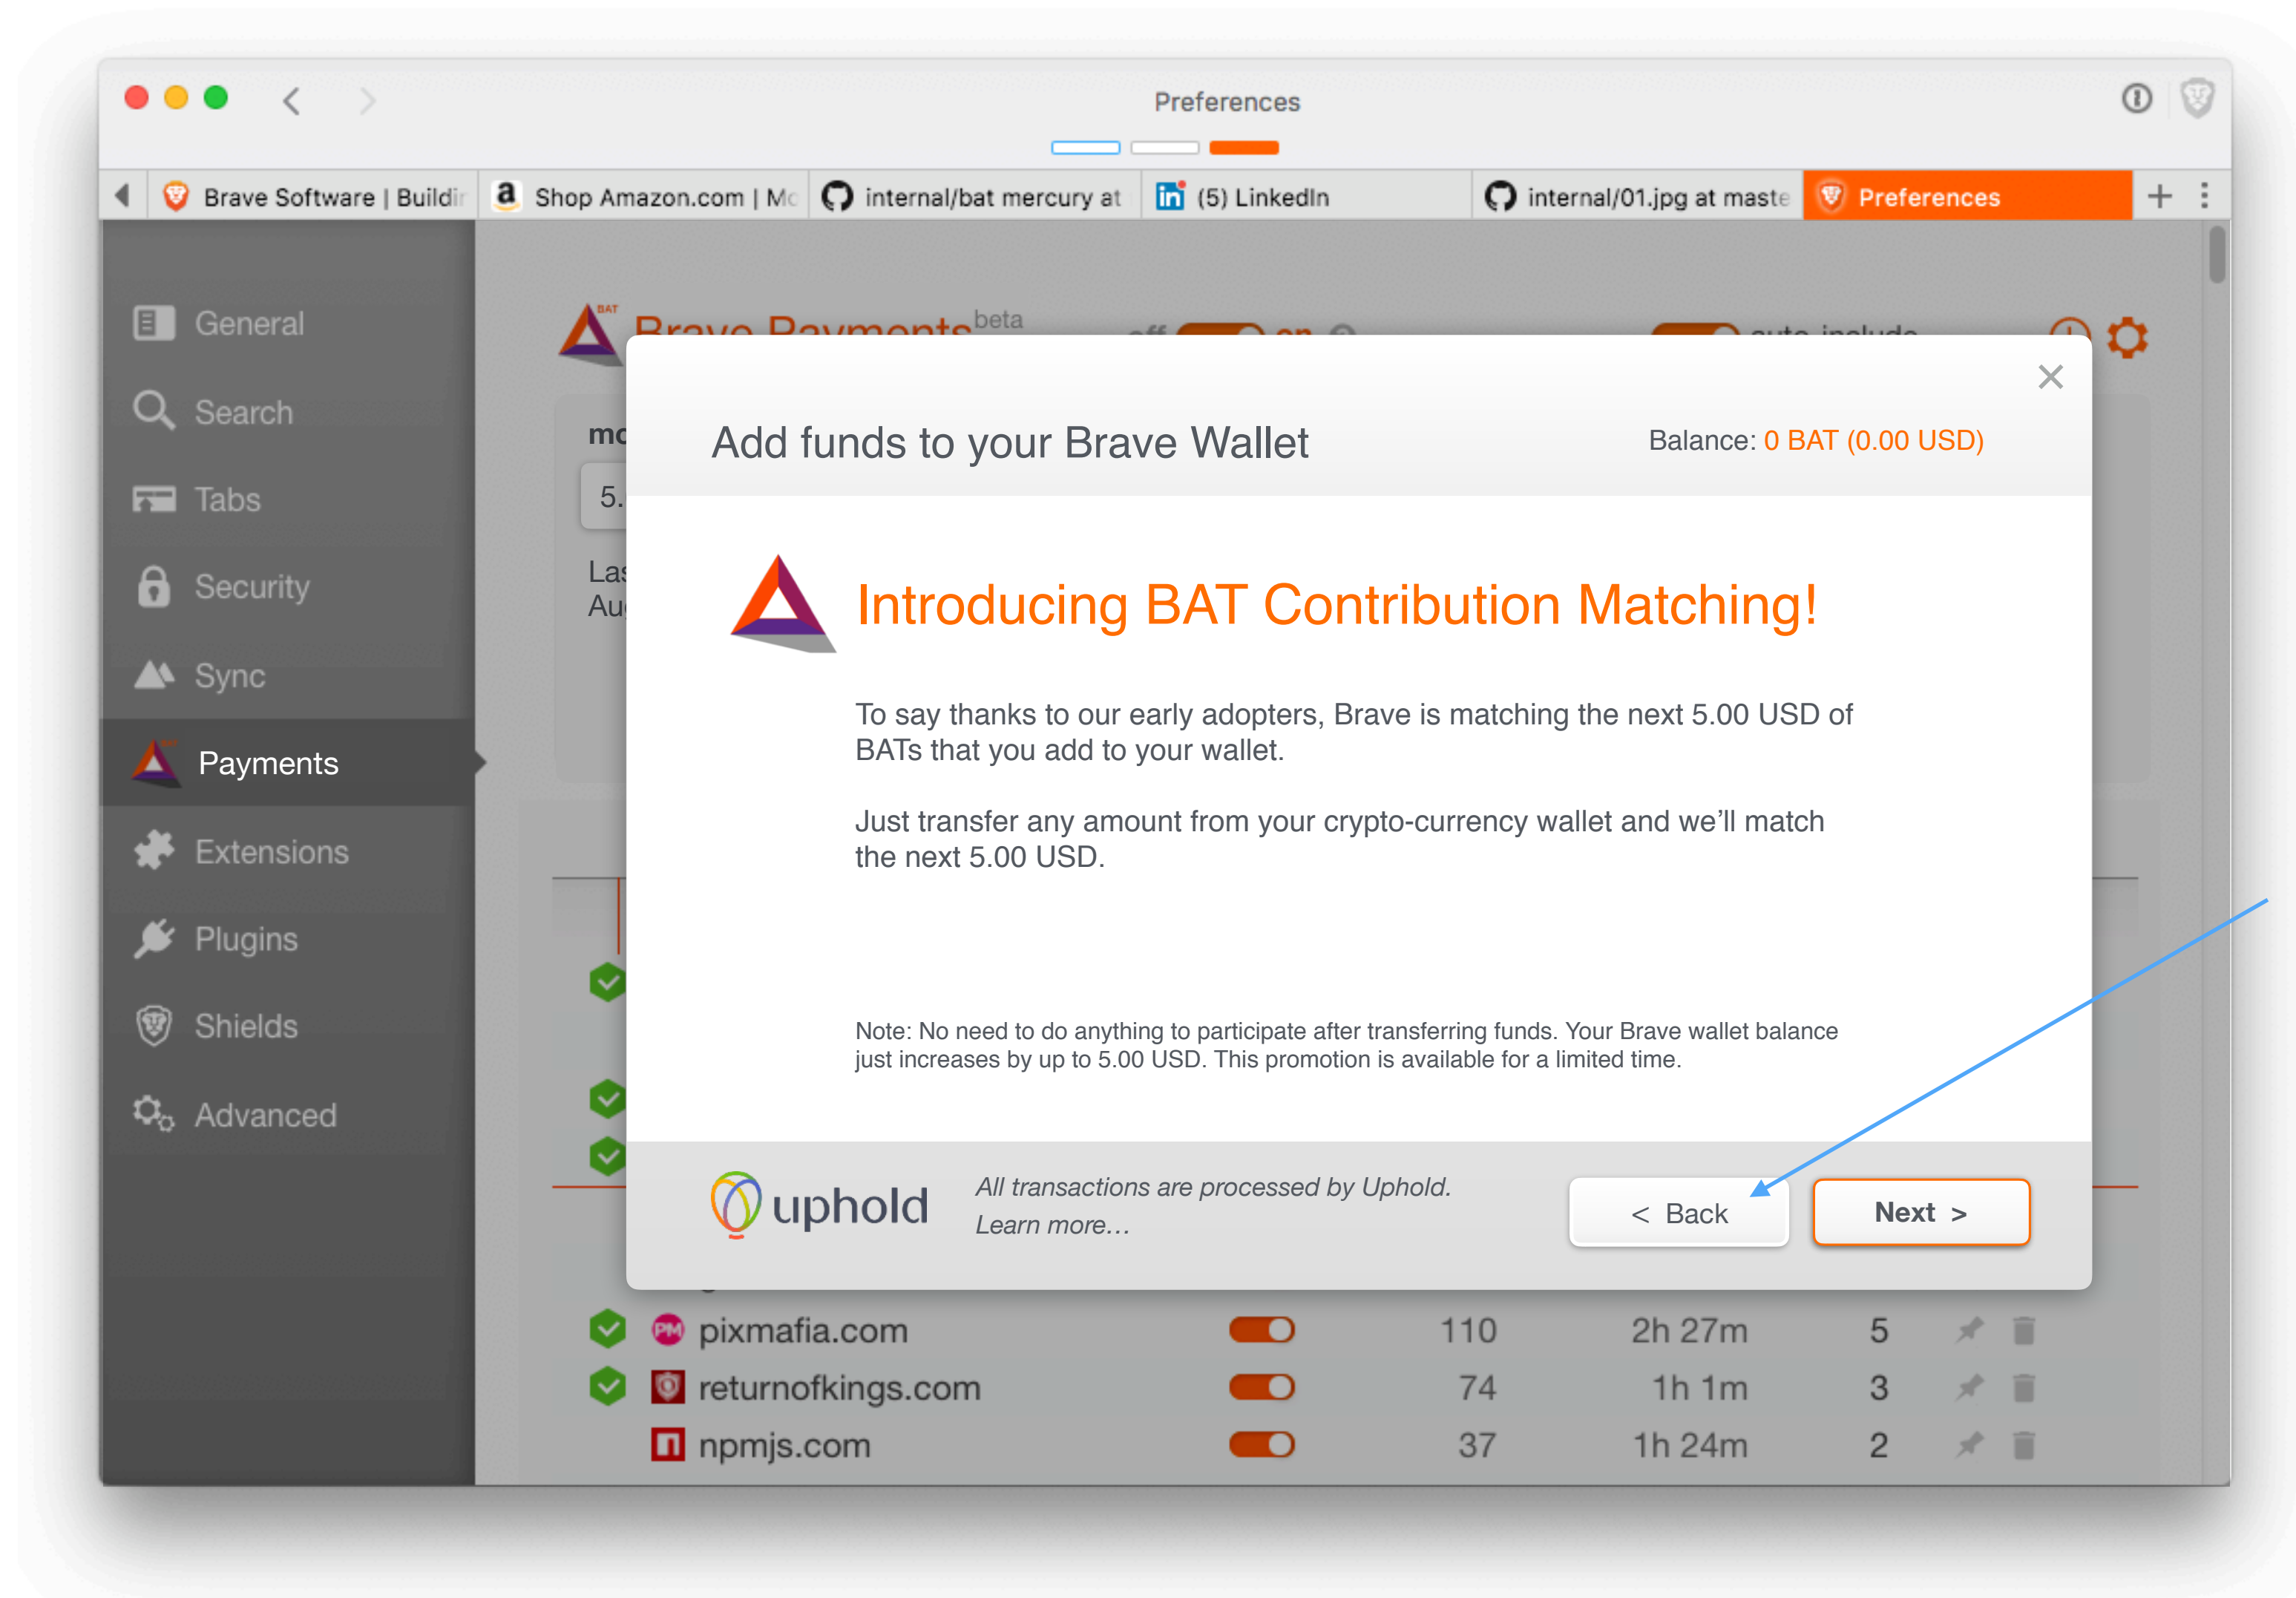

Introduces important aspect of unidirectional money flow.

Next advances the wizard to the next slide.

Brave Payments beta

Add funds to your Brave Wallet   Balance: 0 BAT (0.00 USD)

Hello, and thank you for using Brave Payments!

Brave Payments allows you to make anonymous, monthly contributions to the publishers you visit on the internet.

Please note that **your Brave Payments Wallet is unidirectional,** and the money you transfer from outside accounts **can not be retrieved or refunded**. The wallet's primary purpose is to send your contributions to publishers each month, based on your control and advisement.

uphold   *All transactions are processed by Uphold. Learn more…*   Next >

Add Funds Wizard
Dynamic Page 2

Back button appears, allowing navigation back to the initial wizard page.

Add Funds Wizard
Main Page

This back button will NOT appear once both (n) message screens have been viewed.
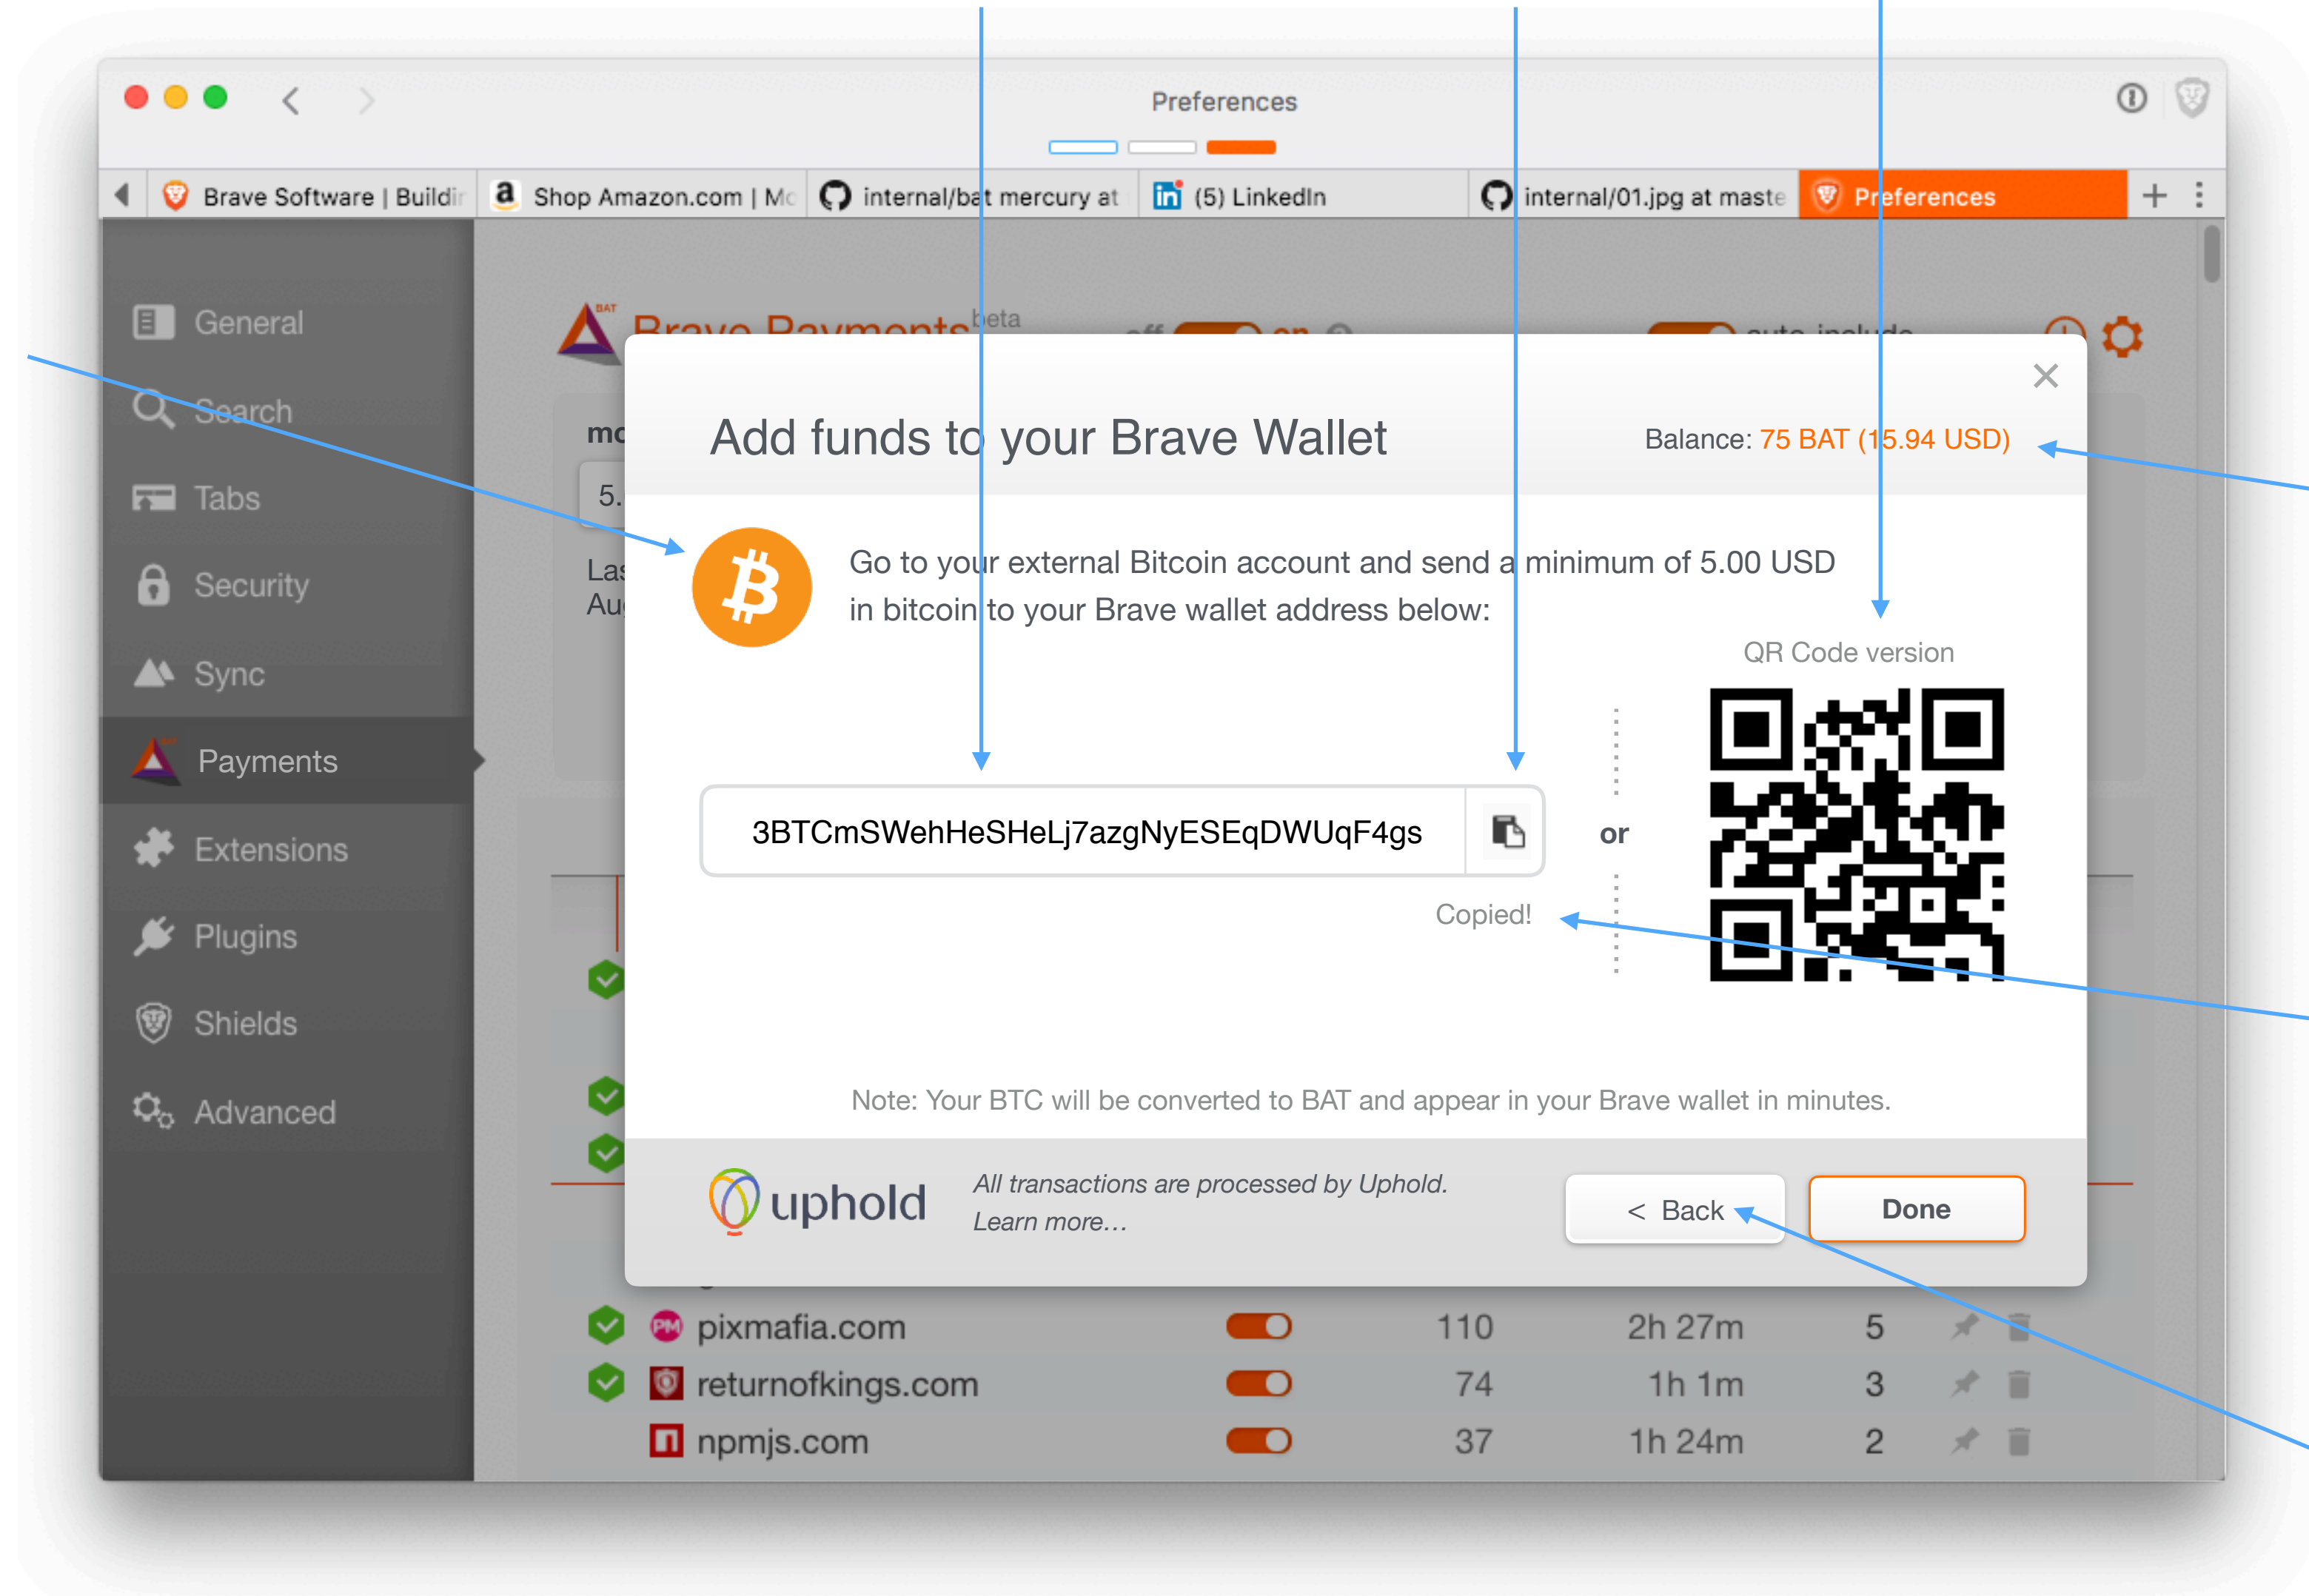

Hyperlinked to : https://brave.com/faq-payments/#brave-payments

Add Funds Wizard
Address Page

QR Code does NOT contain an amount. Only the wallet address shown on the left.

Address is hyperlinked ONLY if the user's URI handler is already configured.

copy to clipboard

Currency type is repeated to remind user of selected type.

The balance should live-update while the wizard is open. The user can open a new tab, transfer money, and come back here to confirm it occurred.

Copied! is shown briefly after pressing the copy button.

This back button will ALWAYS appear to allow for consecutive funds from different mcurrency accounts without closing out of the Add Funds wizard.
